

ENJOY *FOG-FREE* *VISION* WITH **NOVA ANTI-FOG CLOTH**

Nova Eyewear, the flagship brand of Vision Rx Lab, brings a much needed solution for spectacle wearers who are facing difficulty in getting clear vision when pairing glasses with masks for protection during the on-going pandemic. People often find their lenses fogging up while wearing their glasses with masks on. This is due to the fact that when one breathes out, the warm breath shoots upwards out of the top of the mask and as it hits the colder lens, it cools down, forming condensation, or fogging.

The latest innovation from the kitty of the global brand, Nova Anti-Fog Cloth helps to keep glasses fog-free for long hours with every use. This easy to carry cloth works with 2 simple steps of steaming up the lenses by exhaling air and then wiping it for 10 seconds with the special anti-fog cloth for keeping the glasses fog-free. It could be used on existing glasses and is effective on all kinds of lenses and coatings. Also a
